- **Travelodge** - Washington A1 (N) Northbound
Tel: 0871 984 6270

Biomass Awareness Seminars

Government targets are driving the renewable heating market forward like never before, and with £22bn being spent on heat in the UK in 2012, isn't it about time you found out what all the fuss is about?

With 20 times more wood-fired boilers than heat pumps installed under the new Renewable Heat Incentive scheme since its launch, Schiedel Chimney Systems and re:heat, the experts in heating with wood, are holding a series of FREE OF CHARGE Biomass Awareness Seminars for heating engineers and contractors at their new training facility in Washington. The training centre, which is the only HETAS accredited site offering the full range of HETAS courses in the northern half of the UK, boasts excellent facilities for those considering a move into the booming wood heating market.

COURSE CONTENT

The seminars will introduce the scale of the opportunity that is emerging for wood-fired heating appliances, and provide valuable insights into the UK market, including specific case studies. Those attending will also have the opportunity to tour the facilities, where Schiedel have live rigs show-casing traditional wet and dry multi-fuel stoves, and also cutting-edge automated wood-fired boilers from leading Austrian manufacturer, ETA Heiztechnik.

WHO SHOULD ATTEND

The course provides an ideal introduction for the heating engineer who may be interested in going on to take the HETAS H005BR Building Regulations and Standards or the H005 Biomass Installer Course and wishes to improve their knowledge of this key sector.

COURSE DATES

The Biomass Awareness Seminars will run on the following dates:

- April 4th 2014
- July 14th 2014
- October 14th 2014

The courses commence at 10.00 and will finish by 13.00. Refreshments will be provided.

BOOKING INFORMATION

Spaces are limited and will be booked on a first come, first served basis.

For bookings contact us on 0191 416 11 50
